

AUTUMN 2 2024

In maths, we used rulers to accurately measure classroom objects in centimetres and millimetres.

We have written an exciting quest story and an interesting non-chronological report about an island. We have used 'Katie Morag Delivers the Mail' for our inspiration.

We love reading every day in the Rabbits class. We can use our 'Concentrate' and 'Have a Go' Learning muscles. We enjoy reading to an adult and showing them how we are progressing.

In science, we have been learning about animals, including humans. We made models of human arm joints to investigate how muscles in our arms work.

We enjoyed hot chocolate with marshmallows for our Class Goal reward. Yummy!
