

# SPRING 1 2025

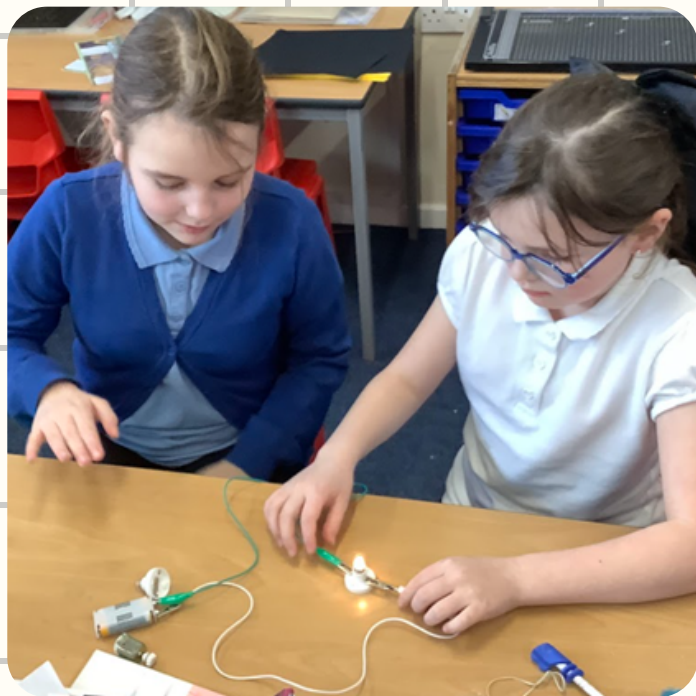

We had a visit from the Imam at the Mosque to help us celebrate world religion day. They gave us lots of new information on Ramadan to help us understand the importance of this celebration in the Muslim community.

In our writing, we looked at 'The Tear Thief'. She left her magic jar of tears in our classroom, and we all thought about what feelings those tears could have collected.

During Maths we have been exploring how we can represent different groups to create fact families and how to notice adjacent multiples.

In science, we have enjoyed exploring circuits. We performed tests, and made observations using different components. We also discussed how electricity is used in everyday life, helping us to make predictions for the future.

When looking at products and factors we discovered that the only time we get an odd product is if both factors are odd!

In Design and Technology, we have explored and evaluated levers and linkages. We have designed and created our own moving mechanisms.

# Y4 NIGHTINGALES
