

SPRING 1 2025

In English, we have been using drama techniques to explore 'The Magic Flute' story and then used this to help us in creative writing.

STEM Event

Year 5 took part in a visit to Craven Park to learn about careers in the Science industry. We got to do lots of fascinating experiments and investigations.

In our Jigsaw lessons, we have been exploring our dreams and goals for the future, including things we would like to achieve and improve at, as well as researching different careers we may want to have.

We have been exploring new and exciting ways to help us learn and consolidate spelling rules, including lots of interactive games to make learning fun!

In computing, we have been learning how to connect, programme and debug Crumble Kits. We've really had to use our concentration and perseverance skills as this has been very tricky, but exciting learning.
