

SPRING 1 2025

Mathematics

In maths we have been learning about the numerals 3 and 4. Linking this to shapes; triangles have 3 sides and squares and rectangles have 4.

Communication and Language

We have been developing our talking with each other. We can organise games by ourselves and tell our grown ups if we need something or need some help.

Literacy

We have listened to the stories Lost and Found, The Three Little pigs and Goldilocks and the Three bears. We have enjoyed retelling the stories using puppets.

Physical Development

We have been developing our scissor skills to help us gain independence. We have been doing lots of activities such as threading and jigsaws to help develop our finger strength further.

Expressive Arts and Design

In the craft area we have been learning how to make things. We have been creating the characters from the stories we have been reading. We are also using our imagination to create models using the construction kits we have.
