

SPRING 1 2025

In maths we have been exploring 2D and 3D shapes. We learned about their properties and then made 3D shapes using Clixi and then 2D nets.

We have been busy writing letters, post cards and invitations this half term, linked to the story, *Meerkat Mail*.

We have been reading the story *Meerkat Mail* and even had Sunny the Meerkat join us for this half term!

We also enjoyed taking part in the Children's Picture Book awards.

In Geography our topic is 'What makes the world hot and cold?' We learned about the equator, the 7 continents and the five seas! We then used our knowledge to research a location and pack a suitcase appropriate for its climate.

We have enjoyed two Now Press Play experiences.

We have travelled the five oceans to save a polar bear from a fisherman and used our knowledge of materials and recycling to defeat The Wicked Witch of the Waste!
